

Challenge Authority Cards

Listen for a point that the teacher makes that you think you could debate. Debate the teacher, using supportive examples or evidence to prove your point.

Prepare a false answer to one of the questions, and try to convince the teacher or students that you are correct.

Question the text. Did the textbook authors make any errors? Use any poor examples? Have a biased perspective? Leave out something essential?

How could you “fix” this experiment/game/situation (i.e., cheat) so that the outcome would be different?

Look for cultural bias in the lesson. Would other cultures view it in the same way? Make the same choices?
